SMELLY CAT AR

AUGMENTED REALITY DONE RIGHT

"STRIVE TO PROVIDE THE MOST UNIQUE USER EXPERIENCE YOUR IMAGINATION CAN CONCEIVE"

SMELLY CAT AR MISSION STATEMENT

TABLE OF CONTENTS

AUGMENTED REALITY (OVERVIEW)

▶ Augmented Reality (AR) is a technology that overlays digital information on a user's real life environment. Using glasses or goggles, things such as images, videos, or statistics are overlayed on a user's real environment in real time. AR will change our everyday lives and revolutionize things like education, law enforcement, social media, gaming and athletics.

   ▶ In education, students can immerse themselves into interactive learning experiences that bring abstract concepts to life

   ▶ Law enforcement can use facial recognition software to apprehend suspects that may be hiding in plain sight

   ▶ Fans can view player statistics overlayed on their favorite player as they watch them live in-person and all in real time

SMELLY CAT AR (GAME)

► SMELLY CAT AR is a game in which users find and collect virtual felines using clues such as virtual footprints and virtual aromas

► Players use AR enabled devices to search for cats in real world locations

► The game includes clues that help you find the cats such as virtual aromas, puzzles, and mini games

► Some of the found felines will come with backstories and prizes from our web3 ecosystem (digital assets)

► SMELLY CAT AR has a social component that allows users to team up, compete, and even trade their found cats

SMELLY CAT AR (TOKEN)

▶ SMELLY CAT AR (SCAR) tokens will play a very important role in the game and will provide real world benefits to holders

▶ Token holders can unlock rare and exclusive cats in the game to expand their collection

▶ SCAR tokens will be used for in-game purchases to enhance gameplay

▶ Token holders gain access to real world events

▶ Token holders are automatically entered into contests for exciting prizes from SMELLY CAT AR

SCAR TOKENOMICS

- 1,000,000,000,000
